Featuring Intel® Core™ i7 vPro™ processor
Public safety personnel of all types rely on mobile technology to remain connected, efficient and informed. The right technology can increase a first responder’s ability to make split second decisions. And, in a job where seconds can make the difference between life and death, the job of selecting a mobility solution is of vital importance.

The solutions you choose must not only fit your budget today and tomorrow, they should be flexible enough to serve your field workforce, wherever duty takes them. In the office or barracks, on the road or on foot, their mobile computing devices must perform without fail. First responders must be able to rely on their gear as they would their trusted partner.

Fujitsu with its trusted integration partners deliver a complete mobile computing solution with unrivaled performance, versatility and durability.

On the following pages you will learn why Public Safety agencies across the country choose Fujitsu as their trusted partner for rugged and reliable mobile computing solutions.

Wherever duty takes you. Inside the vehicle. Out in the Field. Everywhere.
Inside the vehicle. Out in the Field. Everywhere.

**INSIDE THE VEHICLE:** Small footprint, Safe, and Reliable Mobile Office for First Responders

**OUT IN THE FIELD:** Dependable mission critical connectivity that goes where you go

**EVERYWHERE:** From Initial Purchase Through the Life of the Solution

Featuring Intel® Core™ i7 vPro™ processor
INSIDE THE VEHICLE: A Comfortable, Safe and Reliable Mobile Office for First Responders

Fujitsu and its integration partners, provide a custom mobile office solution designed around the LIFEBOOK® T-Series and STYLISTIC® Q-Series tablet PCs. The Fujitsu tablet is mounted in custom-designed, pressure-fit, powder-coated steel mount and paired with a fully rugged, backlit and removable keyboard. This allows for vital components and connections to be tucked neatly behind the screen, creating more room and safety for the operator.

The swing-away mount feature, which can attach to the side of any after-market console, offers the look and feel of an in-dash without altering the dashboard of the car. It provides full visibility through the windshield and both side mirrors and complete access to the passenger seat. When your officers need access to the vehicle’s basic dash controls, they simply pull on the mount and push back to lock in place. The separate keyboard tray also swings out of the way to provide access to the center console.

Featuring Intel® Core™ i7 vPro™ processor
Active Docking offers generous connectivity to all your peripherals inside the vehicle, including two side USB ports accessible to the user, Ethernet, HDMI, audio and power. Fast and simple active docking delivers true versatility and mobility, inside and outside the vehicle.

| Comfortable Ergonomics | • 3-way adjustable mount  
|                         | • Detachable, backlit keyboard |
| Officer Safety          | • Clear line of sight and increased peripheral vision  
|                         | • Obstruction-free airbag zone |
| Secure and Reliable     | • Shock and vibration resistant Locking mount  
|                         | • Constant connectivity |

Featuring Intel® Core™ i7 vPro™ processor
OUT IN THE FIELD: Rugged, Reliable Mobility That Goes Where You Go

Fujitsu tablets are designed and tested for the harshest environments, yet are lightweight, sleek in design, packed with processing power and deliver the latest connectivity and security options. Everything you need to be agile and productive in the field.

**Built to take it**

- MIL-STD-810G certified for robustness
- Chemically strengthened glass and a magnesium alloy cover
- Shock-absorbing disk and solid-state hard drives

EVERYWHERE: From Business Decision to Deployment

We know that public safety agencies deal with extreme environments as well as budget pressure. That’s why Fujitsu solutions are not only built to last for long-term return on investment (ROI), they’re offered at an affordable price point. The Fujitsu Flexible Leasing Program allows for regular technology refreshes.

When things do go wrong – which is unavoidable in the rough and tumble world of first responders – we’ve got your back with a variety of uptime features and flexible service and support:

- Hot-swappable components
- Dedicated round-the-clock service engineers
- Extended warranty programs, such the 3 year warranty from ADP
- Accidental damage protection insurance
- Training and support for self-maintenance programs

SUCCESS STORY: City of Muskogee Police Department

The Muskogee Police Department (MPD) services over 40,000 residents covering 46 square miles. The 90 officers that make up the MPD strive to make their city one of the safest in America. Unfortunately, their fleet of Dodge Chargers and Ford Crown Victorias were not equipped with mobile computers and their officers were spending a good portion of each 10-hour shift completing reports back at the station.

On the recommendation of several other departments, as well as industry reviews, the MPD went with Brite’s Fujitsu Solution. The LIFEBOOK T-series convertible notebook with Swing-Away mount was chosen for its top-of-the-line Intel® technology, versatility, adjustability and officer’s viewing comfort.

Today, the MPD has gone virtually paperless with their incident reports and officers are saving an average of one to two hours per shift, which means more time on patrol and a safer Muskogee.
The Fujitsu-Brite solution delivered on all of the MPD’s must-have features, including:

- **Compatibility:** Brite delivered and installed a complete communications package, including a rugged Sierra Wireless modem and a low-profile combination antenna for excellent cellular and GPS reception.

- **Usability:** With an emphasis on officer comfort, the Fujitsu solution was designed for maximum flexibility and visibility, offering ergonomic computing, easy access to the dash and an unobstructed view out the windshield.

- **Durability:** The rugged and dependable Fujitsu solution delivers years of worry-free service.

“We’re able to keep officers on the street, the computers are fabulous and the mounting did everything Brite claimed it would do. Our officers love them. We’ve had no complaints at all, which is very unusual. So they must be great.”

-- Chad Farmer, Deputy Chief, City of Muskogee Police Department
A Closer Look at the STYLISTIC Q739
The State of the Art in Public Safety Mobility

- 13.3-inch, full HD anti-glare touch screen
- Eighth-generation Intel® processors with Turbo-Boost
- MIL-STD-810G certified with grip corners
- Up to 16 GB of RAM and 128 GB solid-state hard drive
- Detachable backlit (optional)
- Front and rear-facing cameras with autofocus
- One USB port and one micro-HDMI
- Lightweight at 1.7 lbs

Intuitive 2-in-1 Design
Turn your tablet into a true hybrid computer with the optional backlit keyboard docking station.

Paramount Security.
Multiple security features including Intel® vPro®, area fingerprint sensor and Smart Card reader options

Smart Usability.
Wide-view, bright LED display for enhanced outdoor viewing.

Flexible Connectivity.
Optional embedded 4G/LTE with GPS, WLAN with Bluetooth and NFC for the ultimate in connectivity options.

Adaptable Design.
Flexible accessories like an optional keyboard cover that turns your tablet into a clamshell notebook.
